**Statement from the Danish Environmental Protection Agency to
green account for the financial year of 2008 for PolyPeptide
Laboratories A/S.**

The Environmental Centre of Roskilde has received the green account for
the financial year of 2008 for PolyPeptide Laboratories A/S.

Statement

The information in the green account 2008 is in accordance with our
information about the company. We have no information about other
substantial facts that in our opinion would have required inclusion in the
green account.

Complaints

Please note that The Environmental Centre of Roskilde has received no
complaints about PolyPeptide Laboratories A/S during the financial year in
question.

Background

The statement relates to the below information in the green account,
however The Environmental Centre did not estimate conditions concerning
deposit of substances on soil, removal of waste and discharge to public
sewer as the municipality is inspecting these conditions.

Basic information

- Items listed in accordance to which the company has been approved
- Information about the company's most substantial environmental
certificates including information about recipient for direct discharge
of waste water and permission to connect to the public waste water
system.
- Date for the latest revision of the company's environmental
certificate(s)
- The short, qualitative description of the substantial conditions

regarding resource and environment characterizing the company's main activity and side activities if any.

Management review

The management review gives an account for the company's activities during the financial year to remedy infringements of conditions and to prevent repetitions, if any.

Information about environmental conditions

- Information about the company's most substantial consumption of energy, water and raw materials
- Information about substantial types and quantities of polluting substances that
 - are included in the production processes
 - are discharged by the company to the air, the water and the soil
 - are included in the company's products
 - are included in the company's waste
- Information about the company's waste production and handling including information about
 - the total quantity of waste
 - the quantities of waste that go to recycling, combusting and depositing
 - separating the quantity of waste in substantial fractions
 - the company's effort to sort the waste
- Information about noise, dust and odour conditions
- Information about environmental conditions in §7 section 1 that are not relevant to the company

Summary of the self-control

- Summary of the results of the company's self-control that clearly shows how the company's measurements relate to the conditions of the approval.

Yours sincerely
